EDUCATION

Information Technology Management
University of Wisconsin- Milwaukee

09/2016 – 05/2020   *3.7 spring 2020 GPA*

Courses

- Visual System Development
- Global Info Technology Management
- System Analysis and Design:
- Data Base Management systems:
- Enterprise System Concept and issues:
- Object-Oriented Systems Development:

PERSONAL PROJECTS

Data Modeling
- Identified primary & foreign keys for a conceptual data model and came up with assumptions for an enterprise, used CASE tools

Data Normalization
- Converted data from list view to standard view and identified all functional dependencies to normalize it in 3NF, then later integrated the data and made accurate assumptions

Database Design
- Used an Enterprise data model and viewed integrated database schema to create logical & physical database design to make resolution of the differences and create a final database model

SQL
- Created tables and organized data to fit the tables then constructed queries to further organized data to make it easier for date retrieval that pertained to a conceptual enterprise model

PL/SQL
- Furthered my understanding in Oracle creating efficient tables for data retrieval

WORK EXPERIENCE

Hostess
Punchbowl Social

11/2019 – 03/2020   *Milwaukee, WI*
